

Direct Fab® is treated for direct dye sublimation printing by dipping. Unlike traditional dye sublimation printing, you can print an image onto the fabric directly without transfer paper. DOxford provides strong durability, highly ink absorption and anti-shrinkage effect to prevent the material shrinkage on heating process. With the thickest base material and its strongest durability, it is suitable for luxurious indoor or outdoor graphics. In comparison with traditional dye sublimation printing, you will be able to save much more cost and working time as well as avoid the various problems, such as skewing, wrinkling and so on.
