

Direct Fab® is treated for direct dye sublimation printing by dipping. Unlike traditional dye sublimation printing, you can print an image onto the fabric directly without transfer paper. DPongee provides high printing quality and excellent ink penetration to back side of the fabric. Treated for Anti-shrinkage to prevent the material shrinkage on heating process. With the softness and high ink penetration, it is suitable for all kinds of flag or banner applications. In comparison with traditional dye sublimation printing, you will be able to save much more cost and working time as well as avoid the various problems, such as skewing, wrinkling and so on.
